Henny Penny Incursion

As part of the Year 2 unit ‘What is a cycle of life?’ students have been learning about life cycles. We had some new additions to Year 2 over the last few weeks, baby chicks! Students were lucky enough to witness the life cycle of a chicken. We watched the chicks hatch from their eggs and were amazed at how quickly they grew. We loved playing and holding the chicks. Some of the students were even able to put the chickens to sleep by patting their stomachs.
