As part of the Year 4 unit the focus being ‘How do living things impact on the Earth?’ we visited the Royal Botanic Gardens in Cranbourne which contains one of Victoria’s most precious areas of native bushland and is home to a variety of plants and animal life. We explored the range of Australian native plants and the diversity of the Australian fauna. We also investigated how varieties of plants reflect the Australian landscape.

Here are some photos of our recent excursion to the Royal Botanic Gardens in Cranbourne.
