This month the Year 2 students have been learning about the water cycle.

We went on an excursion to the Maroondah Park Reservoir, near Healesville. After a long bus trip we arrived at the park and went on a tour of the grounds. We saw the huge dam that supplies some parts of Melbourne with water. At the bottom of the park we saw the huge wall that holds all the water in the dam and the overflow which looked like a big waterfall. It made so much noise that we couldn’t hear each other speaking.

We learnt a lot about how to look after our water supply to ensure everyone has enough water to survive.
